

Cohort Consortium Working Group / Project In-Person Meetings
November 28 – 30, 2018
NCI Shady Grove Campus, Rockville, Maryland

Prostate Cancer Cohort Consortium (PC3) Working Group Meeting

Date: Friday, November 30, 2018

Time: 1:30pm-3:00 pm

Room: 3E032/034

Leader(s): Lorelei Mucci, Michael Cook, Eric Jacobs, Elizabeth Platz

The PC3 working group of the NCI Cohort Consortium are: 1-) To provide information on prostate cancer resources available across the cancer epidemiology cohorts, including biorepositories; 2-) To create a forum for investigators interested in proposing collaborative studies across the cohorts; 3-) As a group, to identify topics in which a collaborative study would be more successful, such as when an exposure category or disease subtype is rare and where power would be an issue; 4-) To synergize the expertise of the diverse working group members in order to accelerate science on prostate cancer epidemiology.

Agenda for November 30, 2018 Meeting

- a. Brief summary of prostate cancer data and biospecimen resources across cohorts
- b. Brief updates on potential PC3 projects discussed at last year's meeting
- c. Discussion of potential criteria for prioritization of research projects in PC3
- d. Discussion of methods for collaboration in PC3
 - I. Building upon the infrastructure of other collaborative projects
 - II. Data/Material Transfer Agreements
 - III. Pooling and harmonizing of data
 - IV. Access to data
- e. Discussion of initial PC3 Group Papers
 - I. Definitions of PC for epidemiologic research – update and next steps
 - II. Prostate cancer risk factor consensus panel – update and next steps
- f. Charge for future calls
- g. AOB
